

ENDINGS AND BEGINNINGS – TOP END OF YEAR AND NEW YEAR ACTIVITIES OF THE MOST SUCCESSFUL PRACTICES (2 part series)

Part 1 – End of Year Checklist for Practice Success

In this session, we will explore the various activities and analyses practices should complete to close out their year and prepare for practice success in the new year. Practices will be given a list of KPIs and reports they can run and the tools to analyze these reports. Decisions about how to best launch a New Year of practice will also be explored.

Part 2 – New Year Activities to Launch Practices to the Next Level

In this session we will discuss implementation of new (and sometimes, reimplementing of old) systems and processes that help place a practice in a position for significant growth and success in the New Year. Activities will include ways to set reasonable and achievable goals, key items of housekeeping and housecleaning, exploring new revenue streams, and keeping cash flow strong in the first 3 months of the year when reimbursements are dry and deductibles are ripe.
